

DAB Series Desiccant Air Breathers

The DAB series desiccant air breather from Filtrec Asia Pacific is designed to enhance the longevity of any hydraulic system by capturing the moisture and particle contamination before it can enter the hydraulic reservoir.

Model	D	L1	L2	L3	L	M	S	Retention volume	Desiccant weight	Maximum air flow	Filtration level	Breather Replacement part number
DAB90-90	95.5	33	90	58	18	G3/4	36	85 g	270 g	0.5 m3/MIN	3 Micron	A105G03
DAB90-150	95.5	33	150	58	18	G3/4	36	170 g	540 g	0.5 m3/MIN	3 Micron	A105G03
DAB120-145	126.5	45	145	99	25	G1 1/4	53	285 g	840 g	1.25 m3/MIN	3 Micron	AB120
DAB120-255	126.5	45	255	99	25	G1 1/4	53	570 g	1680 g	1.25 m3/MIN	3 Micron	AB120

DAB filters are fitted with check valves to ensure that there is no moisture migration into the desiccant when there is no change in air volume of the system. This feature allows longer intervals before replacement is required.
